PROFESSIONAL SUMMARY

Prompt Engineer with around 3 years of hands-on experience across the LLM stack, including prompt design and optimization, RAG labeling, RLHF, chatbot and voice / TTS systems, hallucination analysis, and LLM evaluation at NVIDIA and as a freelance specialist. Skilled in building prompt frameworks, structured prompt pipelines, evaluation rubrics, and AI content workflows powered by OpenAI and Anthropic APIs. Works comfortably across the full LLM stack, from prompt design and benchmarking through to integration with product and engineering teams. Has shipped four public, tested projects on GitHub spanning a LangGraph agent, a RAG Q&A system, a prompt evaluation framework, and a prompt library.

Core Skills: Prompt Engineering, LLM Evaluation & Benchmarking, RAG, RLHF, Conversational AI / Chatbots, Voice AI & TTS, Few-shot & Chain-of-Thought Prompting, Hallucination Reduction, Prompt Frameworks & Pipelines, A/B Testing, Python, OpenAI / Anthropic APIs, Git, Linux

EXPERIENCE

- **Freelance** Remote
AI Prompt Engineer & Content Strategist *June 2024 - Present*
 - Engineered prompt frameworks and structured prompt chains for GPT-based models to automate content generation, ad copy, social media, and landing page text across multiple verticals.
 - Built reusable prompt templates and dynamic prompt pipelines for bulk content generation, improving consistency, scalability, and team productivity.
 - Ran iterative A/B testing and prompt experimentation on LLM outputs, refining prompts based on engagement metrics, CTR, and CPC performance.
 - Tracked LLM behavior across prompt formats to enforce semantic accuracy, reduce hallucinations, and stay within platform-specific tone, structure, and token constraints.
 - Applied few-shot, role, and structured prompting techniques to align outputs with brand voice and audience segmentation.
 - Integrated SEO principles within prompt-generated blog content and service pages to improve organic discoverability.
 - Client work included Contour Aesthetic Clinic (beauty and wellness) via Lamp Media Tech.
- **NVIDIA** Pune, India (Remote)
Associate Prompt Engineer *September 2023 - May 2024*
 - **LLM Projects:** RAG labeling, NVIDIA ACE, Vehicle Automation Training, NBA Score Prediction AI, Text-to-Speech, RTX.
 - Designed, tested, and optimized prompts to improve accuracy, consistency, and reliability of LLM outputs across diverse document processing and conversational use cases.
 - Created evaluation rubrics and QA checklists to benchmark model behavior, grade response quality, and log failure modes.
 - Analyzed LLM failure modes including hallucination, summarization gaps, and reasoning errors, and refined prompts to handle edge cases and fallback paths.
 - Worked on RAG labeling pipelines to improve retrieval-grounded response quality across document types.
 - Created and refined chatbot responses using Reinforcement Learning from Human Feedback (RLHF) to enhance conversational AI accuracy.
 - Curated diverse speech datasets with varied dialects and accents to support TTS (Text-to-Speech) model training.
 - Designed high-quality question prompts for model testing and ground-truth dataset creation.
 - Generated NLP queries for mapping and contextual understanding of user intents.
 - Collaborated with product managers, engineers, and SMEs to integrate prompt workflows into document processing and data extraction APIs.
 - Categorized and organized datasets into structured, domain-specific taxonomies to support precision in model training and inference.
 - Detected syntactic and semantic anomalies in datasets to improve data integrity and model reliability.
 - Maintained alignment with AI ethics guidelines and responsible AI practices across delivered work.
- **NeoITO** Kochi, India
Technical Content Writer *July 2023 - August 2023*
 - **Technical Content Writing:** Marketing Content, Prompt Generation, working with Office suite.
- **SysTools** Delhi, India
Technical Trainee *July 2022 - March 2023*

- **SEO Optimization:** Maintained, optimized, and promoted organization websites to rank in top 10 search results. Increased domain authority by 10 positions in under 3 months and tripled customer inquiries during tenure.
- **Technical Content Writing:** Worked with marketing and technical teams on technical content with well-researched keywords; supported link building, on-page, and off-page optimization.

- **Safe Branding**
Technical Specialist

Kannur, India
March 2021 - Feb 2022

- **SEO Analysis:** SEO analysis, brand image uplift, and traffic / Domain Authority growth for clients.
- **Developer:** Website front-end / back-end and mobile app development using the Flutter framework.
- **Marketing:** Worked with the marketing team to align deliverables with client requirements.

- **Infocx Technologies**
Development Intern

Kochi, India
August 2021

- **App Development:** Learnt Flutter for app development in Android Studio, got familiar with good programming practices, Gradle, and version control; built a CRUD app to store sheet music.

EDUCATION

- **Vimal Jyothi Engineering College (Affiliated to KTU)**
Bachelor of Engineering - Computer Science & Engineering

Kannur, India
2018 - 2022

Courses: Operating Systems, Data Structures, Computer Organization and Architecture, Software Engineering and Project Management, Object Oriented Concepts, Web Technologies, Big Data Pipeline, Data Mining & Warehousing, Distributed Computing

PROJECTS

- **Agentic Assistant (Personal Project, 2026):** LangGraph tool-using agent (ReAct loop) that reasons, selects tools (semantic search, calculator, datetime), and composes them to answer multi-step questions, with a visible reasoning trace. Tech: Python, LangGraph, LangChain, OpenAI.
- **RAG Q&A System (Personal Project, 2026):** Retrieval-augmented Q&A with deliberate chunking, a persistent vector store, relevance-scored retrieval, and an anti-hallucination generation step that cites its sources. Tech: Python, LangChain, ChromaDB, FastAPI, OpenAI.
- **Prompt Evaluation Framework (Personal Project, 2026):** Python framework to benchmark prompt performance across LLMs with YAML test cases, multi-metric scoring (accuracy, relevance, hallucination, consistency), and A/B prompt comparison. Tech: Python, OpenAI API, pytest.
- **Prompt Library & Testing Suite (Personal Project, 2026):** Versioned production prompt templates (extraction, summarization, classification, generation) with an automated, check-based test runner that validates outputs against declared checks. Tech: Python, YAML, pytest, OpenAI.
- **Unmasking of a Masked Face using GAN (LAMP stack, Web Dev, DBMS, KVM):** Tech: Linux, Apache, PHP, HTML, CSS, MySQL, PHPMyAdmin (2021).
- **Real-Time Vital Analyzation System and Gesture Navigation for Disabled People:** API Handling, Image Processing, Serverless Computing. Tech: PHP, Spotify API, JSON, GCloud (2022).
- **Full Stack Project (Legacy chat protocol, Web Crawler, Serverless):** Tech: NodeJS, AWS, IRC, JavaScript, WebSockets, Python, CRON, DynamoDB (2022).

SKILLS SUMMARY

Languages:	Python, Java, C, SQL, Dart, C++
Tools / Frameworks:	OpenAI API, Anthropic API, Hugging Face, Git, Label Studio, Jenkins, MySQL, MS Office
Platforms:	AWS, Linux, macOS, Windows, Android, iOS
Technical Skills:	Prompt Engineering, Few-shot & Chain-of-Thought Prompting, Structured / Role Prompting, RAG, RLHF, LLM Evaluation & Benchmarking, Hallucination Reduction, Prompt Frameworks & Pipelines, A/B Testing, Conversational AI / Chatbots, Voice AI & TTS Dataset Curation, Question Synthesis, Ground-truth Answer Creation, NLP Anomaly Detection, Data Taxonomy & QA
Soft Skills:	Leadership, Strong analytical & problem solving, Customer empathy, Excellent written & oral communication, Adapts to fast-paced environments, Proactive & self-motivated
Spoken Languages:	English, Hindi, Malayalam (Professional fluency)
